

Bug Report:

Wednesday 23 April 2025 15:48

Title:

Changing my permission from Admin to Normal on a Project, being stuck from there.

Description:

When we changed our status from being an 'Admin' to 'Normal' in the Projects member area of the site and under team members, you are no longer able to leave the project. Before doing this we can leave the project as an admin, which deletes the Project without a confirmation prompt, but once you're a 'Normal' member you no longer have the ability to leave or change your member status back to Admin.

Steps to reproduce:

- Navigate to Projects page
- On a created project, navigate to Members
- Click on Admin
- Change Permissions from Admin to Normal
- Press Leave

Severity - Medium

Priority - Medium
